

IFU IN LATIN AMERICA

IFU – global investor and fund manager with unique expertise

IFU is a Danish state-owned Development Finance Institution supporting the Sustainable Development Goals through private-sector investments in developing countries and emerging markets with the aim of building green, just and inclusive societies.

IFU is fund manager for several public-private investment funds, including the Danish SDG Investment Fund. Total capital under management is USD 1.6 billion.

IFU's experienced investment teams provide commercial expertise throughout the entire investment and ownership period.

Headquartered in Copenhagen, IFU has regional offices in Asia, Africa, Latin America and Eastern Europe and approx. 40 advisers in selected countries around the world, enabling close dialogue and easy access to IFU's extensive network and capabilities.

50 years of experience

Active ownership and support throughout the investment period.

1,300 investments in more than 100 countries

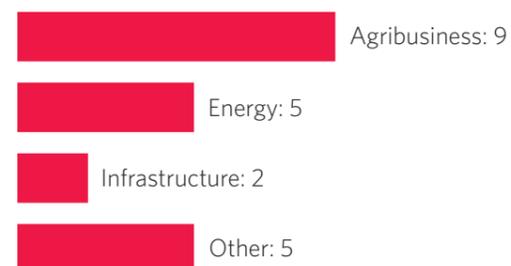

Profound knowledge of sustainability issues

Active investment portfolio in Latin America

IFU's active portfolio in Latin America includes 21 investments across ten different countries. The investment cases are carefully aligned with IFU's main objectives; to create impact and value through the right focus areas. IFU looks to build a green and inclusive economy in Developing countries without increasing the ecological footprint.

Current investments are distributed in the following sectors:

www.ifu.dk

Coexca – High quality pork, Chile

IFU and Coexca, one of Latin America's leading producers of high-quality pork, have joined forces in Chile. The partnership enables Coexca to double their production capacity while raising the bar for animal welfare, environmental management and productivity. IFU brings strong practical experience and network from the EU agribusiness sector contributing to a clear value creation plan for Coexca.

Maria Elena – Agribusiness, Argentina

Maria Elena is successfully running grain, cattle and pig farming in General Villegas on the Argentine Pampas. IFU has provided multiple loans enabling the company to upscale production capacity and construct a biogas plant producing renewable energy from feed stock generated at Maria Elena's San Marcos Estate. The 1.2MW biogas plant has obtained a PPA with local utility CAMMESA.

Utilizing global experience with investing in emerging markets
